(54) Title: DISINFECTING COMPOSITIONS AND PROCESSES FOR DISINFECTING SURFACES

(57) Abstract

The present invention relates to a liquid disinfecting composition comprising an effective amount to a disinfecting material and a poly(alkylen glycol) alkyl ether having the following formula: $R_1-O-(CH_2-CHR_2O)_n-R_3$, wherein R_1 and R_2 each independently are a hydrogen or a substituted or unsubstituted, saturated or unsaturated, linear or branched hydrocarbon chain having from 1 to 30 carbon atoms or a hydroxy bearing linear or branched hydrocarbon chain having from 1 to 30 carbon atoms, R_3 is a substituted or unsubstituted, saturated chain having from 7-30 carbon atoms, and n is greater than 2, or a mixture thereof. The present invention also encompasses a process of disinfecting a hard-surface with such a composition.
